

Test Documentation: System Cloner and App Cloner

Module: System Cloner (Dual System Space)

Functionality: Creation and Switching

Test Case ID	Description	Pre-conditions	Test Steps	Expected Result	Status
TC_SC_001	Verify the creation of a System Clone.	Device has enough storage (minimum 2GB free).	1. Go to Settings → Privacy → System Cloner. 2. Tap Get Started. 3. Set a unique Lock Screen Password (different from the Main System). 4. (Optional) Assign a specific fingerprint for the clone.	The system must successfully generate a secondary space and boot into a fresh ColorOS home screen layout.	Pass
TC_SC_002	Verify switching systems from the Lock Screen using Passwords.	System Clone is active with Password 'B'. Main System has Password 'A'. Phone is locked.	1. Wake the screen. 2. Enter Password 'B'. 3. Lock the phone again. 4. Wake the screen and enter Password 'A'.	1. Entering 'B' must boot directly into the Clone System. 2. Entering 'A' must boot directly into the Main System.	Pass
TC_SC_003	Verify switching systems using assigned Fingerprints.	Right Thumb is mapped to Main System. Left Thumb is mapped to Clone System.	1. Lock the device screen. 2. Scan the Left Thumb on the fingerprint sensor.	The device must unlock and seamlessly transition into the Clone System without asking for a PIN.	Pass

Functionality: Data Isolation & Edge Cases

Test Case ID	Description	Pre-conditions	Test Steps	Expected Result	Status
TC_SC_004	Verify data isolation between Main and Clone systems.	A photo is captured and saved in the Main System.	1. Switch to the Clone System. 2. Open the Photos/Gallery app. 3. Open the File Manager.	The photo captured in the Main System must NOT be visible or accessible anywhere in the Clone System.	Pass
TC_SC_005	Verify incoming call behavior when active in the Clone System.	User is currently using the Clone System.	1. Receive an incoming call from an external number.	The call screen must appear normally, allowing the user to answer or reject the call, regardless of the active space.	Pass
TC_SC_006	Verify the deletion of the System Clone.	User is in the Main System. System Clone exists.	1. Go to Settings → Privacy → System Cloner. 2. Tap Delete System Clone. 3. Authenticate with the Main System password.	The Clone System and all its associated data must be permanently erased. Storage space should be freed up.	Pass

Module: App Cloner (Dual Apps)

Functionality: Creation and Execution

Test Case ID	Description	Pre-conditions	Test Steps	Expected Result	Status
TC_AC_001	Verify creating a clone of a supported application.	A supported app (e.g., WhatsApp) is installed.	1. Go to Settings → Apps → App Cloner. 2. Select WhatsApp. 3. Toggle Create app clone to ON.	A secondary WhatsApp icon with a distinct “Cloned” badge must appear on the Home Screen/App Drawer.	Pass
TC_AC_002	Verify concurrent execution of both original and cloned apps.	App Cloner is active for WhatsApp.	1. Open the original WhatsApp. 2. Go to the Home screen. 3. Open the Cloned WhatsApp. 4. Check the Recent Apps menu.	Both applications must run simultaneously in the background without crashing. Both should appear as separate instances in the Recent Apps menu.	Pass
TC_AC_003	Verify data independence between original and cloned apps.	User is logged into an account on the original app.	1. Launch the Cloned app.	The Cloned app must open to a fresh login/setup screen. It must not automatically inherit the login session or cache of the original app.	Pass

Functionality: Deletion & Edge Cases

Test Case ID	Description	Pre-conditions	Test Steps	Expected Result	Status
TC_AC_004	Verify the behavior of the Cloned app when the original app is uninstalled.	Both original and Cloned apps are present.	1. Long-press the original app icon and select Uninstall. 2. Confirm uninstallation.	The system must prompt a warning that uninstalling the original app will also delete the Cloned app and its data. Upon confirmation, both must be removed.	Pass
TC_AC_005	Verify deleting only the Cloned app.	Both original and Cloned apps are present with data.	1. Go to Settings → Apps → App Cloner. 2. Toggle Create app clone to OFF for the specific app. 3. Confirm deletion.	The Cloned app and its data must be removed. The original app and its data must remain completely unaffected.	Pass
